Key Features of 400 AT3

- IP 23 Protection class makes this machine suitable for indoor and outdoor application
- High Ambient Temperature resistance up to 50°C – ideal for Indian atmospheric conditions.
- Allowable Input Voltage Fluctuation range up to +/- 20%.
- Output Cable extendable to 100 meters.
- Double fan available for increased cooling efficiency.
- Compatibility with DG Sets.
- TIG Welding is possible with scratch start.
- Suitable for all kind of acidic, basic, stainless steel and low hydrogen alloy electrodes.
- Unique design of three tier and four cabinet dust-free structure for safety of electronic components.
- Stacking of machines is possible.
- Wheels provided for better mobilization.

Important Safety Features

- Electric shock prevention (Built in VRD less than 13 Volt DC) to protect the operator while working in moist, upper Air or in metal container & congested areas.
- Over-voltage and under-voltage protection.
- Overheating protection.
- Single-phasing protection.

Unique design of triple-tier and four cabinet:

The main power components, PC board, switch, potentiometer are built in two Hermetic Chambers, which effectively prevents ingress of dust. The Intake Port is positioned at the the top layer, which improves the efficiency of heat emission and also protects the electronic parts from getting damaged due to dust.
